What is the CCA Medicare Preferred and CCA Medicare Value Formulary?

A formulary is a list of covered drugs selected by CCA Medicare Preferred and CCA Medicare Value in consultation with a team of healthcare providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. CCA Medicare Preferred and CCA Medicare Value will generally cover the drugs listed in our formulary as long as the drug is medically necessary, the prescription is filled at a CCA Medicare Preferred and CCA Medicare Value network pharmacy, and other plan rules are followed. For more information on how to fill your prescriptions, please review your Evidence of Coverage.

For a complete listing of all prescription drugs covered by CCA Medicare Preferred and CCA Medicare Value, please visit our website, or call us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

Can the Formulary (drug list) change?

Most changes in drug coverage happen on January 1, but CCA Medicare Preferred and CCA Medicare Value may add or remove drugs on the Drug List during the year, move them to different cost-sharing tiers, or add new restrictions. We must follow the Medicare rules in making these changes.

Changes that can affect you this year: In the below cases, you will be affected by coverage changes during the year:

- **New generic drugs.** We may immediately remove a brand-name drug on our Drug List if we are replacing it with a new generic drug that will appear on the same or lower cost-sharing tier and with the same or fewer restrictions. Also, when adding the new generic drug, we may decide to keep the brand-name drug on our Drug List, but immediately move it to a different cost-sharing tier or add new restrictions. If you are currently taking that brand-name drug, we may not tell you in advance before we make that change, but we will later provide you with information about the specific change(s) we have made.
 - If we make such a change, you or your prescriber can ask us to make an exception and continue to cover the brand-name drug for you. The notice we provide you will also include information on how to request an exception, and you can find information in the section below titled “How do I request an exception to the CCA Medicare Preferred and CCA Medicare Value Formulary?”
- **Drugs removed from the market.** If the Food and Drug Administration deems a drug on our formulary to be unsafe or the drug’s manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.

- **Other changes.** We may make other changes that affect members currently taking a drug. For instance, we may add a generic drug that is not new to the market to replace a brand-name drug currently on the formulary or add new restrictions to the brand-name drug or move it to a different cost-sharing tier or both. Or we may make changes based on new clinical guidelines. If we remove drugs from our formulary, or add prior authorization, quantity limits and/or step therapy restrictions on a drug or move a drug to a higher cost-sharing tier, we must notify affected members of the change at least 30 days before the change becomes effective, or at the time the member requests a refill of the drug, at which time the member will receive a 31-day supply of the drug.
 - If we make these other changes, you or your prescriber can ask us to make an exception and continue to cover the brand-name drug for you. The notice we provide you will also include information on how to request an exception, and you can also find information in the section below entitled “How do I request an exception to the CCA Medicare Preferred and CCA Medicare Value Formulary?”

Changes that will not affect you if you are currently taking the drug. Generally, if you are taking a drug on our 2024 formulary that was covered at the beginning of the year, we will not discontinue or reduce coverage of the drug during the 2024 coverage year except as described above. This means these drugs will remain available at the same cost-sharing and with no new restrictions for those members taking them for the remainder of the coverage year. You will not get direct notice this year about changes that do not affect you. However, on January 1 of the next year, such changes would affect you, and it is important to check the Drug List for the new benefit year for any changes to drugs.

The enclosed formulary is current as of 12/01/2024. To get updated information about the drugs covered by CCA Medicare Preferred and CCA Medicare Value, please contact us. Our contact information appears on the front and back cover pages.

How do I use the Formulary?

There are two ways to find your drug within the formulary:

Medical Condition

The formulary begins on page 1. The drugs in this formulary are grouped into categories depending on the type of medical conditions that they are used to treat. For example, drugs used to treat a heart condition are listed under the category, Cardiovascular agents. If you know what your drug is used for, look for the category name in the list that begins on page 1. Then look under the category name for your drug.

Alphabetical Listing

If you are not sure what category to look under, you should look for your drug in the Index that begins on page 106. The Index provides an alphabetical list of all of the drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

What are generic drugs?

CCA Medicare Preferred and CCA Medicare Value covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

- **Prior Authorization:** CCA Medicare Preferred and CCA Medicare Value requires you or your healthcare provider to get prior authorization for certain drugs. This means that you will need to get approval from CCA Medicare Preferred or CCA Medicare Value before you fill your prescriptions. If you don't get approval, CCA Medicare Preferred and CCA Medicare Value may not cover the drug.
- **Quantity Limits:** For certain drugs, CCA Medicare Preferred and CCA Medicare Value limits the amount of the drug that CCA Medicare Preferred and CCA Medicare Value will cover. For example, CCA Medicare Preferred and CCA Medicare Value provides 60 capsules per prescription for celecoxib. This may be in addition to a standard one-month or three-month supply.
- **Step Therapy:** In some cases, CCA Medicare Preferred and CCA Medicare Value requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, CCA Medicare Preferred and CCA Medicare Value may not cover Drug B unless you try Drug A first. If Drug A does not work for you, CCA Medicare Preferred and CCA Medicare Value will then cover Drug B.

You can find out if your drug has any additional requirements or limits by looking in the formulary that begins on page 1. You can also get more information about the restrictions applied to specific covered drugs by visiting our website. We have posted online documents that explain our prior authorization and step therapy restrictions. You may also ask us to send you a copy. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

You can ask CCA Medicare Preferred and CCA Medicare Value to make an exception to these restrictions or limits or for a list of other, similar drugs that may treat your health condition. See the section, “How do I request an exception to the CCA Medicare Preferred and CCA Medicare Value formulary?” on page X for information about how to request an exception.

What if my drug is not on the Formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Member Services and ask if your drug is covered. For more information, please contact us. Our contact information, along with the date we last updated the formulary, appears on the front and back cover pages.

If you learn that CCA Medicare Preferred and CCA Medicare Value does not cover your drug, you have two options:

- You can ask Member Services for a list of similar drugs that are covered by CCA Medicare Preferred and CCA Medicare Value. When you receive the list, show it to your healthcare provider and ask them to prescribe a similar drug that is covered by CCA Medicare Preferred and CCA Medicare Value.
- You can ask CCA Medicare Preferred and CCA Medicare Value to make an exception and cover your drug. See below for information about how to request an exception.

How do I request an exception to the CCA Medicare Preferred and CCA Medicare Value Formulary?

You can ask CCA Medicare Preferred and CCA Medicare Value to make an exception to our coverage rules. There are several types of exceptions that you can ask us to make.

- You can ask us to cover a drug even if it is not on our formulary. If approved, this drug will be covered at a pre-determined cost-sharing level, and you would not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to cover a formulary drug at a lower cost-sharing level. If approved, this would lower the amount you must pay for your drug.
- You can ask us to waive coverage restrictions or limits on your drug. For example, for certain drugs, CCA Medicare Preferred and CCA Medicare Value limits the amount of the drug that we will cover. If your drug has a quantity limit, you can ask us to waive the limit and cover a greater amount.

Generally, CCA Medicare Preferred and CCA Medicare Value will only approve your request for an exception if the alternative drugs included on the plan's formulary, the lower cost-sharing drug, or additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact us to ask us for an initial coverage decision for a formulary, tier, or utilization restriction exception. **When you request a formulary, tier, or utilization restriction exception you should submit a statement from your prescriber or healthcare provider supporting your request.** Generally, we must make our decision within 72 hours of getting your prescriber's supporting statement.

You can request an expedited (fast) exception if you or your healthcare provider believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get a supporting statement from your provider or other prescriber.

What do I do before I can talk to my healthcare provider about changing my drugs or requesting an exception?

As a new or continuing member in our plan you may be taking drugs that are not on our formulary. Or, you may be taking a drug that is on our formulary but your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your provider to decide if you should switch to an appropriate drug that we cover or request a formulary exception so that we will cover the drug you take. While you talk to your provider to determine the right course of action for you, we may cover your drug in certain cases during the first 90 days you are a member of our plan.

For each of your drugs that is not on our formulary or if your ability to get your drugs is limited, we will cover a temporary 31-day supply. If your prescription is written for fewer days, we'll allow refills to provide up to a maximum 31-day supply of medication. After your first 31-day supply, we will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility and you need a drug that is not on our formulary or if your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan, we will cover a 31-day emergency supply of that drug while you pursue a formulary exception.

We will provide an emergency supply of at least 31 days (unless the prescription is written for fewer days) for all non-formulary medications including those that may have step therapy or prior authorization requirements for unplanned level of care change. An unplanned level of care transition could be any of the following:

- a discharge or admission to a long-term care facility
- a discharge or admission to a hospital, or
- a nursing facility skilled level change.

List of Abbreviations

EA: Each.

GC: Gap Coverage. We provide additional coverage of this prescription drug in the coverage gap. Please refer to our Evidence of Coverage for more information about this coverage.

GM: Grams

ML: Milliliters

NDS: Non-Extended Day Supply. You may be able to receive greater than a 1-month supply of most of the drugs on CCA Medicare Preferred or CCA Medicare Value Formulary via retail or mail order. Drugs noted with “NDS” are limited to a 1-month supply for both Retail and Mail Order.

PA: Prior approval (or prior authorization). For some drugs, you or your physician or other prescriber must get approval from CCA Medicare Preferred or CCA Medicare Value before you fill your prescription. If you don't get approval, Commonwealth Care Alliance may not cover the drug.

B/D: Prior Authorization Restriction for Part B vs Part D Determination: This drug may be eligible for payment under Medicare Part B or Medicare Part D. You or your physician are required to get prior authorization from CCA Medicare Preferred or CCA Medicare Value to determine that this drug is covered under Medicare Part D before you fill your prescription for this drug. Without prior approval, CCA Medicare Preferred or CCA Medicare Value may not cover this drug.

PA_NSO: Prior Authorization Restriction for New Starts Only. If this drug is new to you, you (or your provider) are required to get prior authorization for CCA Medicare Preferred or CCA Medicare Value before you fill your prescription for this drug. Without prior approval, CCA Medicare Preferred or CCA Medicare Value may not cover this drug.

QL: Quantity Limit. For some drugs, CCA Medicare Preferred and CCA Medicare Value limits the amount of a drug you can get. For example, CCA Medicare Preferred and CCA Medicare Value provides 60 tablets per 30-day prescription of ENTRESTO.

ST: Step Therapy. For some drugs, CCA Medicare Preferred and CCA Medicare Value requires you to do step therapy. This means you will have to try drugs in a certain order for your medical conditions. You might have to try one drug before we will cover another drug. If your healthcare provider thinks the first drug doesn't work for you, then we will cover the second.

ST_NSO: Step Therapy for New Starts Only. If this drug is new to you, you are required to first try certain drugs to treat your medical condition before we will cover another drug for that condition.

List of Drugs by Medical Condition

The drugs in this section are grouped into categories depending on the type of medical conditions they are used to treat. For example, if you have a heart condition, you should look in the category, "Cardiovascular Agents". That is where you will find drugs that treat heart conditions.
